☒ Other - completion

13. Describe Proposed or Completed Operations

It is intended to complete the Dakota formation of the subject well. Isolate the Dakota below a cast iron bridge plug. Complete the Wildcat Mancos at approximately 5720-5820'. Produce the Wildcat Mancos only for six months to determine production rates and reservoir pressures. After the six month test period for the Mancos formation, the Mesaverde formation will be completed. A trimingle application will be applied for if all formations are completed successfully.
