## SUNDRY NOTICES AND REPORTS ON WELLS

NOTICE OF INTENTION TO DRILL	SUBSEQUENT REPORT OF WATER SHUT-OFF
NOTICE OF INTENTION TO CHANGE PLANS	SUBSEQUENT REPORT OF SHOOTING OR ACIDIZING
NOTICE OF INTENTION TO TEST WATER SHUT-OFF	SUBSEQUENT REPORT OF ALTERING CASING
NOTICE OF INTENTION TO RE-DRILL OR REPAIR WELL	SUBSEQUENT REPORT OF REDRILLING OR REPAIR
NOTICE OF INTENTION TO SHOOT OR ACIDIZE	SUBSEQUENT REPORT OF ABANDONMENT
NOTICE OF INTENTION TO PULL OR ALTER CASING	SUPPLEMENTARY WELL HISTORY
NOTICE OF INTENTION TO ABANDON WELL	

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

August 19, 1948

Well No. 4 is located 1980 ft. from N line and 560 ft. from E line of sec. 35  
C NE/4 of SE/4 35 32N 14W HMPM  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Ute Dome (Wildcat) San Juan New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6137 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

As per our telephone conversation of August 12, the following work was performed:

Total depth of well is 8602 feet. A total of 8600 feet of 17 5/8" casing was landed and cemented with 970 sacks of Unaflo Cement using casing centralizers and wall scrapers. On August 14th, after a waiting time of 72 hours, water shut-off was tested as follows: A pressure of 1000 lbs. was built up and held for one hour, and as test was OK, cement plug was drilled to a depth of 8568 feet, and a pressure of 1000 lbs. again built up and held for one hour. No leaks in casing was detected, and completion operations were resumed. Tests witnessed by T. C. Harman, Farm Boss, Stanolind Oil & Gas Co.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
