If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Dugan Production Corp. would like to begin producing the subject well as soon as a gas contract can be negotiated with the Navajo Tribal Utility Authority (NTUA).

We have been negotiating with the NTUA for an extensive period of time and recently received a response to a gas contract proposal covering a separate tribal lease that we hope could also be used for the Horseshoe #1 with little modification.

We request approval to keep the well shut in until a gas market can be secured.
