WTR Oil Company  
Drawer LL  
Cortez, Colorado 81321

Gentlemen:

The Navajo 3X located in 0-27-32N-17W has not had an operator change filed with this office. We show it still being operated by James P. Woosley. If it is now the WTR Oil Company well, we need to have form C-104 filed with this office and 9-331 filed with the U.S.G.S. stating the change.

Some of the injection pressures were very high. Normally the allowable is .2#/ft. of depth to the top of the pay zone. This may be caused by the well bore being plugged. Please keep us informed of the pressures monthly, especially if you acidize or work over any of the wells.

If you have any questions please contact this office.

Yours truly,

A handwritten signature in cursive script that reads "Jeff A. Edmister".
