(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

BayStar Petroleum is currently in an acidizing program of all wells on the Navajo M¹³ PLleases. The M¹³ has been scheduled for an acid job in the first of November, 1985. This well has been saved for late ^{in program} due to the lesser potential. The acid job will consist of 3 barrels water mixed with 1 barrel Turflow and displaced into formation with 4 barrels of water. The acid will be left in over night and swabbed dry the following days. The well will then be put on production if successful.
