COMMENCE DRILLING OPNS. ☐ PLUG AND ABANDONMENT ☐  
CASING TEST AND CEMENT JOB ☐  
OTHER: ☐

12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work.) SEE RULE 1103.

**This well has been T&A'd for several years and never sold gas commercially. It was being held for a possible disposal well application but is not needed any longer. In conjunction with some pipeline ROW's and work the landowner has requested that we P&A this well and restore the location.**

**Please see attached for procedures. Hallwood plans to P&A this well during October, 1998.**

CONDITIONS OF APPROVAL, IF ANY:

**ROBINSON #34-2**

**Plug and Abandon Procedure**

**AFE #81401062**

1. MIRUSU, blow down well.
2. RIH with work string of tubing to PBTD of 1915'. Contact OCD representative to witness plugging.
3. Pump a 60-sx cement plug that will provide about 300' of fillup in casing to 1600'.
4. Pull up hole laying down tubing to 900'. Pump another 60-sx (300') cement plug.
5. Pull up hole laying down tubing to 435' and pump an 80-sx cement plug to surface.
6. Pull out w/tubing, make sure cement is near surface. Discuss with OCD and landowners to see if well can be marked below ground level with a weld-on cap instead of an "above ground" dry hole marker.
7. Cut off casinghead 3-4' below ground level.
8. Weld on plate.
9. Pull up gravel, anchors and all equipment.
10. Level and remove rocks from adjacent pipeline ROW for Jewell family.
