DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to drill with rotary tools to an approximate total depth of 600' to obtain geological information. Electrical surveys will be run and the hole plugged and abandoned according to U.S. G.S. regulations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
