GENERAL INSTRUCTIONS

This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning

the use of this form and the number of copies to be submitted, particularly with regard to local area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

SPECIFIC INSTRUCTIONS

Item 4 - If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 13 - Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones,

or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.

NOTICE

The Privacy Act of 1974 and the regulation in 43 CFR 2.48(d) provide that you be furnished the following information in connection with information required by this application.

AUTHORITY: 30 U.S.C. 181 et. seq., 351 et. seq., 25 U.S.C. et. seq.; 43 CFR 3160.

PRINCIPAL PURPOSE - The information is to be used to evaluate, when appropriate, approve applications, and report completion of secondary well operations, on a Federal or Indian lease.

ROUTINE USES:

- (1) Evaluate the equipment and procedures used during the proposed or completed subsequent well operations.
- (2) Request and grant approval to perform those actions covered by 43 CFR 3162.3-2(2)
- (3) Analyze future applications to drill or modify operations in light of data obtained and methods used.
- (4)(5) Information from the record and/or the record will be transferred to appropriate Federal, State, local or foreign agencies, when relevant to civil, criminal, or regulatory investigations or prosecutions.

EFFECT OF NOT PROVIDING INFORMATION - Filing of this notice and report and disclosure of the information is mandatory once an oil or gas well is drilled.

The Paperwork Reduction Act of 1980 (44 U.S.C. 3501, et. seq.) requires us to inform you that:

This information is being collected in order to evaluate proposed and/or completed subsequent well operations on Federal or Indian oil and gas leases.

This information will be used to report subsequent operations once work is completed and when requested, to obtain approval for subsequent operations not previously authorized.

Response to this request is mandatory for the specific types of activities specified in 43 CFR Part 3160.

BURDEN HOURS STATEMENT

Public reporting burden for this form is estimated to average 25 minutes per response, including the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments regarding the burden estimate or any other aspect of this form to U.S. Department of the Interior, Bureau of Land Management, (Alternate) Bureau Clearance Officer, (WO-771), 18 and C Streets, N.W., Wasington, D.C. 2024O, and the Office of Management and Budget, Paperwork Reduction Project (1004-0135), Washington, D.C. 20503.

REPAIR PROCEDURE MOORE LS 5 MV

April 8, 1994 (3rd version)

- 1. Record TP, SICP, and SIBHP.
- 2. MIRUSU.
- 3. TOH with 2 3/8" tubing.
- 4. Clean out well to TD (5589').
- 5. Fracture stimulate according to the attached Point Lookout frac schedule.
- 6. TIH with a RBP and set in the 5 1/2" liner at 5180'. Cap with sand.
- 7. RU lubricator, run a GR correlation log, and perforate the Cliffhouse with a 4" casing gun, 2 JSPF, 120 degree phasing, and 23 g charges. Depths are based on Schlumberger's Electric Log dated 55/02/28, so be sure to adjust these depths according to the correlation log before perforating.

CLIFFHOUSE PERFORATIONS

4748' - 57'	4761' - 64'	4772' - 75'	4855' - 64'
4868' - 72'	4877' - 88'	4893' - 98'	4906' - 14'
4918' - 20'	4923' - 26'	4936' - 38'	4944' - 46'
4988' - 97'	5070' - 79'	5134' - 37'	5162' - 64'

- 8. Fracture stimulate according to the attached Cliffhouse frac schedule.
- 9. TIH with a RBP and set at 4600'.
- 10. Run a GR/CBL from the RBP to surface. Determine TOC.
- 11. Perforate 2 squeeze holes within 100' of the TOC.
- 12. Conduct cement squeezes and run CBLs until cement is to surface and casing will hold a 500 psi pressure test.
- 13. Drill out cement and clean out well to RBP at 4600'.
- 14. TOH with RBPs and clean out to TD with N2.
- 15. Swab/flow back load.
- 16. Once sand entry has ceased, land 2 3/8" tubing at 5400' with a seating nipple 30' off bottom.
- 17. Tie well back into surface equipment and return to production.
