Carter
Well No. No. 1 X is located 1915 ft. from N line and 429 ft. from E line of sec. 21
NE 1/4 Sec. 21 18N 7W 100W
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wildcat Sandoval New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6620 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Permission is requested to move 8 feet North of the present No. 1 well location and redrill this hole 6 1/2" diameter to a depth of 527 feet where an oil sand of commercial value was encounter in No. 1 well.

A rotary drill will be used for this purpose.

We will set and cement one 30 foot length of 8 5/8" surface casing and upon completion of hole, 5 1/2" casing will be placed and cemented on top of oil sand.

It is our opinion the proposed work can be done economically and production obtained at an early date.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company _____

Address 430 Camino del Monte Sol,

Santa Fe, New Mexico.
