San Juan/- Vanderalice
 Well No. **1** is located **990** ft. from **N** line and **1,090** ft. from **E** line of sec. **21**
SW/4 Sec. 21 **23 N** **4 W** **N.M.P.M.**
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wildcat **Sandoval** **New Mexico**
 (Field) (County or Subdivision) (State or Territory)
 ungraded ground
 The elevation of the ~~center~~ **6,992** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Propose to drill with ~~heavy~~ tools to a depth sufficient to thoroughly test the Entrada Sand, expected to be encountered at a depth less than 8,500 feet.

Casing program: Set 200 feet of 10-3/4" - 32.75# surface casing. Cement with 200 sacks of cement, and circulate to surface.

Drill to total depth without setting additional casing. Then set 5-1/2", J-55, 17# casing on bottom if production encountered, and perforate as needed. This "long string" to be cemented with 250 sacks of cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
