Well No. 6 Navajo is located 338 ft. from N line and 930 ft. from E line of sec. 36

SE/4, Sec. 36 22N 14W N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Stony Butte San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to drill a well to test the oil pay from the Allison member of the Mesaverde formation at a depth of approximately 350 feet. Well will be drilled with the use of cable tools, and the 5 $\frac{1}{2}$ -inch producing string will be cemented near the top of the pay should testing indicate favorable production for a commercial well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company L. G. Stearns, et al

Address Aztec, New Mexico

By _____

Title Agent

Company..... L. G. STEARNS, et al.....

Lease..... Navajo..... Well No. 6.....

Sec. 36, T. 22 N., R. 14 W., N.M.P.....

Location 338' from the South line and 930' from the East line.

Elevation 6065, Graded ground.....

Scale—4 inches equal 1 mile.

This is to certify that the above plat was prepared from field notes of actual surveys made by me or under my supervision and that the same are true and correct to the best of my knowledge and belief.
