DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On October 31, 1951, at 1:32 P.M., 5 1/2" casing was landed at 1497 feet with 75 sacks of cement. Rotary tools were moved off and cable tools moved on to drill cement plug and pay. On November 5, 1951, bailed hole dry and remained dry for 2 hours. Drilled 32 feet of solid cement in bottom of pipe and again bailed dry. Hole remained dry for two hours which was considered satisfactory water shut-off test.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
