The elevation of the derrick floor above sea level is 5344 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

T.D. 1352', 5" OD casing set at 1340'. We propose to deepen this well approximately 20' to the base of the First Dakota with a spudder and complete open hole.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
