Aztec, New Mexico

Gentlemen:

We wish to advise you that the attached well is no longer economically capable of producing into our pipe lines. We plan to disconnect this well from our gathering system within the next 60 days unless the daily production is increased.

Due to the extremely low daily production of this well, the changing of charts, servicing of equipment, maintaining pipe lines and roads impose an excessive economic burden on our operations.

We will be pleased to consider reconnecting this well upon notification that it is again economically capable of producing into our lines.

Very truly yours,

SOUTHERN UNION GAS COMPANY

  
Rudy Motto  
Dispatchers Superintendent
