The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Plans are to drill a Slim Hole Strat Test to encounter the Pictured Cliffs formation at an approximate depth of 700'. This well will be drilled for the purpose of obtaining geologic information.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
