(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

May 23, 1956

N. M. Federal "C" Lease

Well No. 8 is located 1980 ft. from N line and 1980 ft. from E line of sec. 31

NE/4 of SW/4 26N 12W New Mexico
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Bisti-Gallup San Juan
(Field) (County or Subdivision) (State or Territory)

The elevation of the ~~drill hole~~ ^{ground} above sea level is 6134 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well with rotary tools to a sufficient depth to test the Gallup Sand expected at 4650'.

We propose to set 200' of 905/8" OD 32.30# J-55 surface casing and cement to surface.

We propose to drill through the Gallup Sand section to a depth of approximately 5000' and if productive, to set 7" OD casing through the zone. We intend to use scratchers and centralizers and enough cement to cement at least 300' above the top of the pay zone.

We propose to gun perforate the casing and sand oil frac the formation during completion.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Sunray Mid-Continent Oil Company

Address Box 128

Hobbs, New Mexico

By J. A. Paery
Title Hobbs Area Superintendent
