(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

_____ 19 52

Well No. 3 is located 122 ft. from NS line and 122 ft. from EW line of sec. 2

122 (1/4 Sec. and Sec. No.) 22 (Twp.) 122 (Range) 122 (Meridian)
California (Field) San Diego (County or Subdivision) California (State or Territory)

The elevation of the derrick floor above sea level is 550 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On December 15, 1951, a well was accidentally spudded at the above location, and surface casing set with four joints of 8-5/8", 20, 1 3/4 casing (11 1/2') set at 12' with 50 sacks regular cement circulated to surface. The rig was moved off.

When proper communication of this lease is effected, it is intended to drill a well with rotary tools through the pictured cliffs (see sketch) and to work the pictured cliffs with two quarts of H.C. per foot.

Casing program:

8-5/8" to 220' with 1 3/4 casing regular cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
