Release Notification and Corrective Action

OPERATOR

☒ Initial Report ☐ Final Report

Name of Company Yates Petroleum Corporation	Contact Amber Cannon
Address 104 S. 4 th Street	Telephone No. 575-748-1471
Facility Name Bilbrey SWD #1	Facility Type Salt Water Disposal

Surface Owner Federal	Mineral Owner Federal	API No. 30-025-27620
--------------------------	--------------------------	-------------------------

LOCATION OF RELEASE

Unit Letter B	Section 5	Township 22S	Range 32E	Feet from the 660	North/South Line North	Feet from the 1980	East/West Line East	County Lea
------------------	--------------	-----------------	--------------	----------------------	---------------------------	-----------------------	------------------------	---------------

Latitude 32.42597 Longitude 103.69426

NATURE OF RELEASE

Type of Release Produced Water	Volume of Release 20 B/PW	Volume Recovered 18 B/PW
Source of Release Discharge line on water pump	Date and Hour of Occurrence 6/2/2015; AM	Date and Hour of Discovery 6/2/2015; AM
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom? N/A	
By Whom? N/A	Date and Hour N/A	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

RECEIVED

By OCD District 1 at 10:45 am, Jun 15, 2015

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

The water pump discharge line ruptured, causing the release. Vacuum truck(s) and roustabout crews were called.

Describe Area Affected and Cleanup Action Taken.*

This release occurred on top of the 4/1/2015 (1RP-3606) release. An approximate area of 40' X 30' was affected within the berm and an approximate area of 0.0253 acres was affected outside of the berm. Most of the fluid was contained in the berm, with some overspray on the northwest side. The wells were shut in and vacuum trucks were called to recover the spill. The current tanks are going to be moved to a different part of the production pad to help with clean-up of this site. Once tanks are moved, vertical and horizontal delineation samples will be taken and analysis ran for TPH & BTEX (chlorides for documentation). If initial analytical results for TPH & BTEX are under RRAL's (site ranking is 0) a Final Report, C-141 will be submitted to the OCD requesting closure. If the analytical results are above the RRAL's a work plan will be submitted to the OCD. **Depth to Ground Water: >100' (approximately 200-225', Section 5, T22S-R32E, per Trend Map), Wellhead Protection Area: No, Distance to Surface Water Body: >1000', SITE RANKING IS 0.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
