Latitude 32.42597 Longitude 103.69426

NATURE OF RELEASE

Type of Release Produced Water	Volume of Release 100 B/PW	Volume Recovered 90 B/PW
Source of Release Water pump	Date and Hour of Occurrence 8/22/2015; AM	Date and Hour of Discovery 8/22/2015; AM
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Kellie Jones & Jim Amos	
By Whom? Robert Asher/Yates Petroleum Corporation	Date and Hour 8/27/2015; 4:41 P.M. (Email)	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

RECEIVED

By OCD District 1 at 1:55 pm, Aug 31, 2015

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

The water pump lost power and the valves were not able to close, causing the release. Vacuum truck(s) were called.

Describe Area Affected and Cleanup Action Taken.*

The area affected was within an unlined bermed battery. The release occurred on top of two previous releases (1RP-3606 and 1RP-3669). All pumps were shut off and the valves were closed. Vacuum trucks were called to recover the released fluid. Due to the two previous spills mentioned above, Yates has been in the process of moving this tank battery and getting it in to a steel, lined containment in order to prevent future contamination issues from releases. As soon as the tanks are completely moved from the current location, vertical and horizontal delineation samples will be taken and analysis ran for TPH & BTEX (chlorides for documentation) for all three releases together. If initial analytical results for TPH & BTEX are under RRAL's (site ranking is 0) a Final Report, C-141 will be submitted to the OCD requesting closure. If the analytical results are above the RRAL's a work plan will be submitted to the OCD. **Depth to Ground Water: >100' (approximately 280', Section 5, T22S-R32E, per Trend Map), Wellhead Protection Area: No, Distance to Surface Water Body: >1000', SITE RANKING IS 0.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
