If a Watercourse was Impacted, Describe Fully.*								PROVEL Kellie Jone						
Cause Unknown. During decommissioning of the tanks associated with the former reclamation plant area, stained soils were observed. Notification was provided to NMOCD. Approximately 220 cubic yards of hydrocarbon-affected soils at the site were excavated. Five trenches to determine vertical and horizontal delineation were implemented, and contaminated soils out to the limit of the delineation trenches were excavated and removed. A letter report that summarizes the excavation and sampling activities completed at the site was submitted to NMOCD (Mr. Geoffrey Leking).  Describe Area Affected and Cleanup Action Taken.*														
The affected area is approximately 50 feet by 60 feet and approximately one foot deep to the top of the cap rock. Soil sampling to delineate the affected soils has been completed. Confirmation samples showed two areas with TPH-DRO above the NMOCD limit of 100 mg/kg. These two areas have been treated with hydrocarbon degrading microbial solution, additional confirmation samples collected at these two areas reported no affected soils above the NMOCD limits. A letter report that summarizes the treatment and sampling activities completed at the site was submitted to NMOCD (Ms. Kellie Jones) on October 7, 2015.														
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
