Describe Cause of Problem and Remedial Action Taken.*

On December 7th, 2015 at 1800 hrs MDT a flow line leak occurred on the Grayburg Battery transfer line, which released 20 bbls of produced water, with 15 bbls recovered. The immediate action by the MSO was to isolate the line, call a vacuum truck, and notify the operations supervisor and HSE. A work order has been submitted to repair the line and the area will be remediated according to NMOCD and COPC guidelines.

Describe Area Affected and Cleanup Action Taken.*

The area was in the pasture and will be remediated according to NMOCD guidelines

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
