Describe Cause of Problem and Remedial Action Taken.\*

The transmitters on the vessel were not operational, which subsequently resulted in the tank to overflow. OXY personnel have corrected the situation by repairing the transmitters.

Describe Area Affected and Cleanup Action Taken.\*

A surface area of approximately three thousand three hundred-thirty (3,330) square feet (sq. ft.) was affected by the release. The impacted area affected OXY assets only. Specifically, a vacuum truck was dispatched immediately to the location in an effort to recover free standing fluids. American Safety Services Inc. (ASSI) will use remediation activities that follow the NMOCD Recommended Guidelines For The Remediation of Leaks and Spills.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
