If a Watercourse was Impacted, Describe Fully.* N/A		
Describe Cause of Problem and Remedial Action Taken.* A hole developed in the weld on the bottom of the oil tank located closest to the produced water tank at the battery. A rag was placed in the hole to slow the release while the oil was transferred into another oil tank. The tank is being evaluated for repairs.		
Describe Area Affected and Cleanup Action Taken.* Approximately 12bbls oil and 22bbls produced water was released from an oil tank into surrounding lined containment. A vacuum truck was called and recovered all 12bbls oil, 22bbls produced water along with 26bbls rain water from lined containment. The containment was checked for holes and none were found. No further action is required.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
