INFORMATION ONLY

January 12, 2017

Dear Amber Groves,

In reference to Holly Energy Partners Monument Section 35 Junction project, the following revegetation plan is being recommended:

In late April or early May 2017, the site will be reseeded with BLM #2-LPC seed mixture and applied at 5lbs/ acre to the entire affected area off the location. The seed mix will be purchased commercially and will be a certified seed mix. There will be no primary or secondary noxious weeds in this mixture. In the event that noxious weeds occur, chemical treatments, along with follow-ups and monitoring will take place. Straw will be scattered over the seed which is intended to hold the seed in place to allow growth to occur. The site will be watered weekly for four weeks. The site will be monitored for growth monthly and the area will be reseeded if growth is not observed within 60 days. When adequate growth has been observed, a report of such growth will be filed with the New Mexico State Land Office.

Please call if I may be of assistance to you in the future.

Sincerely,

James R. Allen CSP, CHMM
President
