Good morning Amber,

Do you approve this re-seeding plan? Just confirming that the re-seed concentration per acre is approved

Thanks,

Todd Passmore  
Marshall & Winston Inc.

**Revegetation and Noxious Weed Management Plan  
for  
Marshall & Winston, Inc.  
Loco Dinero 36 State 2H Release  
OCD Case Number 1R-4526**

April 6, 2017

Once all of the excavated areas have been backfilled, contoured, and the remediation requirements have been met, Marshall & Winston, Inc. proposes the following revegetation and noxious weed management plan for OCD Case Number 1R-4526, the Loco Dinero 36 State 2H release:

*Seed Mix – Certified Weed Free Seed:*

Blue Grama	30.00%	1.5 PLS lbs./acre
Sideoats Grama	27.00%	4.5 PLS lbs./acre
WW Spar Bluestem	8.00%	1.8 PLS lbs./acre
Blackwell Switchgrass	8.00%	3.5 PLS lbs./acre
Sel 75 Kleingrass	8.00%	1.5 PLS lbs./acre
Sand Dropseed	6.00%	1.0 PLS lbs./acre
Texoka Buffalograss	6.00%	8.0 PLS lbs./acre
Little Bluestem	5.00%	3.4 PLS lbs./acre
VNS Tall Fescue	<u>2.00%</u>	4.0 PLS lbs./acre
	100.00%	

The seeding would be done by mechanical broadcast at the rate of 20 lbs./acre as soon as remediation requirements have been met and the plan has been approved by the NMSLO staff (approximate late April timing). After reseeding of the site is complete, continuous monitoring will take place to determine if any more seed needs to be applied, or if there has been any noxious weed invasions. If any noxious weeds were to emerge, chemical treatment would be used to eradicate the problem once the weed species has been identified. Continuous monitoring and any needed follow-up treatments would be maintained until the revegetation of this site is determined to be complete.
