[Revegetation and Noxious Weed Management Plan.pdf](#)

Good Morning, Wendy,

NMSLO will agree that remediation efforts have been achieved. NMSLO requires revegetation plans for any releases that are in a pasture. I will need one for this location. Also, it will not be fully released from NMSLO until desired vegetation is achieved. I have attached our requirements for the revegetation plan.

Thank you,

Amber Groves

Dear Ms. Quintero:

Please see attachment for your records. Like approval from NMSLO is required.

The available information indicates **OPERATOR** has met the requirements of 19.15.29 NMAC and no further corrective action is required. NMOCD considers **1RP-1434** closed. This determination by the Oil Conservation Division does not relieve Operator of responsibility should future information indicate a threat to ground water, surface water, human health, or the environment. Furthermore, it does not relieve Operator of responsibility for compliance with any federal, state, or local laws and/or regulations.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Olivia,

Just sent this message to Tomas and received an automatic reply of a backlog. Just want to make

sure it gets to someone.

Thank you,

Wendy

Hello Tomas,

I hope this email finds you well. We were looking through some of our spill records and realized that we have five order numbers that are still open. Attached please find the closure report that should have been sent to the NMOCDC May 2008. Please let me know if this will be sufficient to close this action item. I will appreciate if you could send an approved final C-141.

Thank you in advance,
