[1RP4419_approved_Targa David Bilbrey Site 1 8in Pipeline Remediation Report, March 2 2017.pdf](#)

Dear Mr. Larson:

Note: In general, NMOCD does not approve of the timeline presented in the remediation reports for 1RP-4419 and 1RP-4420. Corrective actions and backfilling at release location were completed before NMOCD was notified via submission of an initial C-141. Please be advised that these remedial activities were conducted at-risk.

The available information indicates **OPERATOR** has met the requirements of 19.15.29 NMAC and no further corrective action is required. NMOCD considers **1RP-4419 & 1RP-4420** closed. This determination by the Oil Conservation Division does not relieve Operator of responsibility should future information indicate a threat to ground water, surface water, human health, or the environment. Furthermore, it does not relieve Operator of responsibility for compliance with any federal, state, or local laws and/or regulations.

Please see the attachments for your records.

Olivia Yu
Environmental Specialist
NMOCD, District I
Olivia.yu@state.nm.us
575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
