---

Dear Ms. Haskell:

Please see the attachment for your records. For future closures, please be advised that all final C-141 submissions must have accompanying closure reports with bottom and sidewall confirmation samples, indicating the soil at a specified depth is within permissible levels for BTEX, TPH, and chlorides. Method 8015 extended for TPH and Method 300 for chlorides are required.

The available information indicates OPERATOR has met the requirements of 19.15.29 NMAC and no further corrective action is required. NMOCD considers **1RP-4306** closed. This determination by the Oil Conservation Division does not relieve Operator of responsibility should future information indicate a threat to ground water, surface water, human health, or the environment. Furthermore, it does not relieve Operator of responsibility for compliance with any federal, state, or local laws and/or regulations.

Thanks,

Olivia Yu  
Environmental Specialist  
NMOCD, District I  
[Olivia.yu@state.nm.us](mailto:Olivia.yu@state.nm.us)  
575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

---

Ms. Yu,

I was checking on the status of this closure request submitted December 2, 2016. For your

convenience I have attached the NMOCD approved work plan, emails from the NMOCD and BLM approving of the work plan, and BLM closure approval. Please let me know if you have any questions.

Thank You,

Becky Haskell
