Mr. Foster:

NMOCD approves of the proposed additional delineation for 1RP-4702. Permissible chloride levels of 250 mg/kg must be obtained and maintained for 10 ft. further in depth. All laboratory analyses must have accompanying field data. Please confirm and see the attachment for your records.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I
Olivia.yu@state.nm.us
575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: Jay Management - Bell No. 1 Work Plan

Olivia,

Attached is a work plan to address soil impacts from the recent release at the Bell No. 1. The work plan also contains laboratory analysis of samples collected during the initial site assessment.

Please let me know if you have any questions.

Thank you,

Jim Foster
