approved_1RP4705_WorkPlan_DollyNo1_170051_062217.pdf

Good morning Mr. Foster:

Is this delineation workplan only for 1RP-4705? Please be advised that NMOCD allows a corrective action plan to encompass multiple 1RPs if informed and approved in advance.

NMOCD approves of the proposed additional delineation plan for 1RP-4705. Permissible levels of 250 mg/kg chlorides must be obtained and maintained for 10 ft. further in depth. BTEX and TPH permissible levels must be obtained and maintained for a minimum of 2 ft. further in depth. All laboratory analyses must have accompanying field data. Please note that if GW impact is anticipated, one or more temporary GW monitoring wells may be required within the impacted area.

Please confirm and see attachment for your records.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I
Olivia.yu@state.nm.us
575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Olivia,

Attached is a work plan to address soil impacts from the recent release at the Dolly No. 1. The work plan also contains laboratory analysis of samples collected during the initial site assessment.

Please let me know if you have any questions.

Thank you,

Jim Foster

Good morning Mr. Foster:

Confirmed. Please state on the subsequent report that it will cover both 1RP-4704 and 1RP-4705.

Thanks,
Olivia

Olivia,

I just wanted to confirm that our delineation plan will cover both releases at this Site. Please let me know if you have any questions.

Thank you,

Jim Foster
