---

Michael,

There is a historical release to the north of this tank battery that needs to be sampled as well as inside the tank battery. Also shown in the photo that I have attached that I took in September, there looks to be some releases that happened on the south side of the battery. The fence is also down.

As some of the releases are historical, and as previously requested of Sundown, the historical areas will need to go to a depth of at least 4' if not 6'.

Thank you,

Amber Groves

Amber I have the initial C1 41 for this location the GPS puts me out in the middle of the pasture but the C-141 says tank battery I went out to location and saw numerous things that could be considered wrong I don't know specifically what you are referring to. I would assume all of it but with no information on the C-141 I have nothing to go off could you call me or send me the information that you have on this location so we can get it fixed. Thank you so much I look forward to hearing from you
