By Olivia Yu at 4:53 pm, Aug 18, 2017

Describe Cause of Problem and Remedial Action Taken.*

The release was caused when the oil dump valve closed resulting in oil being sent to the flare.

Describe Area Affected and Cleanup Action Taken.*

The fire impacted the location and an area in the pasture adjacent to the pad. No fluids were recovered due to the fire burning off any standing fluid.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
