Ms. Yu,

We will either collect a soil sample per every 50 cu yds. or dispose of the excavated soil.

Thank You,

Becky Haskell

Workplan

Dear Ms. Haskell:

Thank you for the confirmation regarding the remediation conditions for 1RP-4648.

RE: soil blending

NMOCD's concern is that the soil used for backfilling is within permissible levels, not necessarily that blending of hydrocarbon-impacted soil is prohibited. Therefore, the Responsible Operator is required to provide verification. Please submit laboratory analyses (BTEX and TPH extended) of 1 soil sample per 50 yd3 of blended soil to be used for backfilling.

Please confirm or inform of alternative remedial action.

Thanks,
Olivia

Subject: RE: 1RP-4648 - Sneed 9 Federal Com #2 - Soil Investigation and Remediation Workplan

Ms. Yu,

COG agrees to having bottom and sidewall confirmation samples in T2 excavation.

There is no overspray in the pasture, the release remained on location.

Please explain why we can't blend excavated soil. Confirmation samples would be collected to show the excavated soil is below NMOCD standards prior to utilizing it as backfill.

Thank You,

Becky Haskell

**** External email. Use caution. ****

Good morning Mr. Lowry:

NMOCD approves of the delineation completed for 1RP-4648. The conditions of approval for remediation:

- 1) Laboratory analyses (BTEX and TPH) of bottom and sidewall confirmation samples for the proposed excavation in the area represented by T2.
- 2) Statement of liner integrity and photo documentation of the release in the secondary containment.
- 3) Minimum of 1 confirmatory surface soil sample (0-6") in pasture affected by overspray.
- 4) Blended excavated soil is not permitted.

Please confirm.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I
Olivia.yu@state.nm.us

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: 1RP-4648 - Sneed 9 Federal Com #2 - Soil Investigation and Remediation Workplan

Please find attached the *Soil Investigation Summary and Proposed Remediation Workplan* that has been prepared for COG Operating's Sneed 9 Federal Com #2 environmental remediation site. The release site is located in UL "D", Sec. 9, Township 17 South, Range 32 East in Lea County, NM. Upon your review and approval, COG is prepared to begin the activities outlined in the attached *Workplan*.

If you have any questions or need any additional information, please feel free to contact Becky Haskell at 432-818-2372 or Nikki Green at 432-664-6699. Thanks and have a great weekend.
