**** External email. Use caution. ****

Dear Ms. Gonzales:

NMOCD will consider the delineation complete for 1RP-4491 and 1RP-4619. For the proposed remedial activity of 1 ft. excavation, confirmatory laboratory analyses (BTEX, TPH extended, and chlorides) of bottom and sidewall samples are required. Sample locations for bottom and sidewalls must be less than 50 ft. apart. Please mark confirmation sample locations on a scaled map in the remediation/closure report.

Please confirm or inform if clarification is required.

Thanks,

Olivia Yu

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Good Morning,

While checking our records, we found that we have not received a response for the attached work plan. Have you had a chance to review the proposed remediation activities? We would like to begin scheduling the remediation as soon as it is approved.

Thank you,

Clair Gonzales
