Good Morning, Zack,

NMSLO is in agreement with NMOCD on the conditions for approval.

Thank you,

Amber Groves

Mr. Thomas:

I forgot to mention that vertical and horizontal delineation should be extended as much as practicable within the containment area (SP 4 and 5) as well. Please confirm.

Thanks,

Olivia

Good morning Mr. Thomas:

NMOCD approves the proposed additional delineation for 1RP-4724 with these conditions:

1. Collect at least one soil sample (0-6" depth) in the oversprayed area. Mark location on a scaled map.
2. Extend vertical delineation at SP2 and SP3 to at least 5 ft. bgs in addition to further vertical delineation at AH 1-3. Permissible chloride levels must be obtained and maintained for 5 ft. depth. Confirmatory laboratory samples are required for the first and bottom depths of soil within permissible levels.
3. Bottom and sidewall samples of the edges will be required for closure.

Please confirm.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
