These Soil staging areas are not present. I believe all the soil was removed by Sport environmental at the time of the excavation

Chris:

Thank you for the information. Are these two piles of soil still in place? Do you know the status of the liner integrity? I am asking because the BTEX, TPH, and chloride levels at 2 ft., indicated on the map, are very much above permissible levels. These piles either need to be removed to a NMOCD-approved landfill and bottom levels determined.

Thanks,
Olivia

Olivia,

To the best of my knowledge these were lined berms used by Sport Environmental to stage excavation soils

Chris

Dear Chris:

I am curious; what does the soil staging areas (SSA1 & SSA2) refer to on the map? Are these the stockpiles for excavated soil?

Thanks,
Olivia
