4013	12/14/2015	A	Resolute	Federal Davis Tank Battery	17S 38E 13	30-025-05245	8/31/2015
-------------	------------	---	----------	-------------------------------	------------	--------------	-----------

Good morning,

The C-141 has been received and the RP # for this event 4013. At this time the C-141 will only be accepted as an initial. The map provided does not clearly indicate any surface or underground flow lines that would represent a hazard to removal of soil in the areas of SS-1 and SS-2. Also, the areas of SS-1 and SS-2 are not delineated vertically to 250ppm. An updated map with a clear depiction of the flow lines, surface or underground, and their depths along with the complete vertical delineation of the two spots of interest would be extremely beneficial.

Thank you,

Jamie R. Keyes
Environmental Specialist, District 1
Oil Conservation Division, EMNRD

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
