Date: Wednesday, January 11, 2017 12:41:00 PM

Dear Nathan:

Thank you for your prompt response. Since I have not even process your initial C-141 and then subsequently, you must receive OCD approval regarding your workplans before remediation, I suggest that you hold off on the final C-141. I will enter your initial C-141 into the system now. Once I reply back to you, please review the document for details about release delineation/characterization plans.

Thanks,
Olivia

Hello Olivia,

The C-141 report submitted to you by Ms. Boyer is very likely the same report that Broadbent submitted to Kristen Lynch on 12/27/16.

Broadbent is currently working on the final C-141 Report for this spill.

Please respond to me if you have any further questions, as Ms. Galm is unavailable to reply.

Thank you,

Nathan Dunn

Subject: RE: Initial C-141 Report - Hobbs Station #571 Crude Spill

Good morning Ms. Galm:

I was forwarded an initial C-141 completed by Ms. Katharine Boyer at Holly Frontier. The incident details (10 barrels spilt as a result of tank overflow by a Pilot Flying J driver) are very similar to the one you submitted. Can you please confirm that Broadbent is responding to the incident reported by Ms. Boyer?

Thanks,

Subject: Initial C-141 Report - Hobbs Station #571 Crude Spill

Ms. Lynch,

Per the automatic reply email from Mr. Jamie Keyes, attached is the Initial C-141 Report for the approximate 10 barrel crude spill at the Holly Transportation "Hobbs Station #571". Please feel free to contact me with any questions you may have.
