Attachments: 1RP4960.pdf

Dear Mr. Arguijo:

The 1RP for this incident is

4960	2/7/2018	A	Cambrian Mgmt	Kaiser State SWD	30-025-02538	21S-34E-13F	unknown
-------------	----------	---	---------------	------------------	--------------	-------------	---------

Please remember to include this 1RP identifier to all communications. Also, please be advised that a release characterization/delineation workplan as detailed in the attachment must be approved by NMOCD BEFORE any remediation work.

Notes:

- NMOCD agrees to combining the impacted area under 1RP-4855 with 1RP-4960.
- Following up on NMSLO's email on January 3, 2018, is there a course of plan to resolve the releases assigned 1RP-3512, 1RP-3621, and 1RP-4305, which are associated with this location 30-025-02538?
- For like approvals, Mark Naranjo will be the correspondent for NMLSO in the interim.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I
Olivia.yu@state.nm.us
575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: Release Notification: Kaiser State SWD

Ms. Yu/Ms. Honea,

Trinity Oilfield Services, on behalf of Cambrian Management (Cambrian), hereby informs you that Cambrian had a reportable release at its **Kaiser State SWD** in Lea County on 1/31/2018.

- **Release Location:**
 - **Legals:** Unit Ltr "F" (SE/NW), Sec. 13, T21S, R34E
 - **GPS Coordinates:** 32.48008578,-103.4256592
- **API #:** 30-025-02538
- **Release Volume:** 20 bbls of produced water
- **Recovered:** 10 bbls
- **Cause of Release:** Failure of seal on pump
- **Approximate Area Impacted:** 5,000 sq. ft.

An initial C-141 is attached.

The release commingled with a spill that occurred on 10/18/2017 (see 1RP-4855) and was discovered immediately prior to delineation of that release. The spills are in the process of being delineated concurrently, using the methodology described in the "Proposed Activities" section of the 12/4/2017 "Delineation Plan" for the 1RP-4855 release (as well as the 12/29/2017 email response from Ms. Yu).

Upon receipt of laboratory analytical results from the delineation event, an "Environmental Site Summary & Remediation Proposal" (Work Plan) will be developed, outlining an appropriate soil remediation strategy for the site. The Work Plan will be submitted to both the NMOCD and NMSLO for review and approval prior to conducting any excavation activities. The releases will be remediated concurrently.

If you should have any questions, comments, or concerns, please do not hesitate to contact me by telephone or email.

Thank you for your time and consideration.

Respectfully,
Ben J. Arguijo
