**Attachments:** approved\_Remediation Summary and Proposed Closure Strategy - Jal #3 BGTs and 1RP-4408.pdf  
OSE\_WT\_UTM2000.pdf

---

Mr. Lowry:

As you may know, Dr. Oberding is no longer with NMOCD. Mr. Billings is added to the communication for any potential concerns regarding BGTs. Also, please note that there are NMOSE wells within a 2000 m radius, but the depth to groundwater did not change. Please see the attachment. There is no need to change the report.

NMOCD approves of the remedial activities conducted for BGT closure and 1RP-4408. Approval is also granted for the proposed additional remediation. For the excavation B area covered under 1RP-4408, discrete samples are required. Please confirm.

Thanks,

Olivia Yu  
Environmental Specialist  
NMOCD, District I

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

**Subject:** Remediation Summary and Proposed Closure Strategy- Jal #3 BGTs and 1RP-4408

Tomas and Olivia,

Please find attached a *Remediation Summary and Proposed Closure Strategy* that has been prepared for the Jal #3 Field Scrubber BGT Site. The report includes information related to the removal of the BGTs and the adjacent overflow release 1RP-4408 that we discussed with Olivia during our last meeting. Rose and I were hoping to start work back up out sometime early this week. If you have

any questions or need any additional information, please feel free to contact myself or Rose Slade by phone or email. Thanks.

Respectfully,

**Joel Lowry**
