Ms. Haskell:

NMOCD grants like approval to the modified remediation plan for 1RP-4562. Please submit a revised map with the dimensions of the lined area, as described by BLM below, demarcated with GPS coordinates.

Thanks,
Olivia

Good Afternoon Rebecca,

Thank you for the clarification.

BLM accepts and approves your request to excavate the impacted area to 4ft below ground surface and install an impermeable liner. Liner will extend 2ft. past the impacted area to prevent/ minimize leaching. Must have like approval from NMOCD prior to starting work. And again, if pit area needs additional reclamation, please address at this time as well. Thank you. j

Ms. Yu and Ms. Price,

This is really the site I meant to send to you and not the Geronimo.

The original work plan submitted to both of you for the above site called for either excavating the impacted area to two (2) feet with the installation of a liner and then backfilling or deferment until the facility was closed. The two (2) foot excavation with liner installation was approved. However, when I approached the production department to notify them that we would be performing work at the location they asked for us to hold off. I was later notified that they were evaluating the production rates for this facility. This particular facility is not producing and I was recently informed that they have intentions of plugging and abandoning the well and getting rid of this facility. That being said we are requesting to excavate the impacted area to four (4) feet below ground surface and placing a liner once the equipment is removed. A reclamation will be conducted and the area will be seeded for revegetation once the conditions are favorable. Please let me know if you have any questions.

Thank You,

Becky Haskell

Henryetta,

Please find attached an approved remediation plan from the NMOCD for this spill site. Also, the email chain below reflects the OCD's approval. This plan had been sent to Shelly. If you would please review and give BLM's approval as soon as possible it would be greatly appreciated. One tank has been moved out of the way causing the well to be down and COG would like to get this remediation performed so the well can be put back into operation.

If you have any questions, please let me or Becky know.

Thanks, Cliff

Dear Mr. Brunson:

Like approval from BLM is also required for 1RP-4562, regarding depth of excavation in terms of revegetation upon site reclamation.

Thanks,
Olivia

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Olivia and Shelly,

Please find the attached Delineation Workplan and remediation proposal for the COG Gunslinger 11 Fed Com #002 (1RP-4562). COG is requesting that you review this plan and is looking forward to the OCD's and BLM's approval.

If you have any questions, please let me know.

Thanks, Cliff
