**Subject:** ARU Tank battery: October 28, 2017 release  
**Date:** Thursday, February 22, 2018 3:03:00 PM  
**Attachments:** 1RP4974.pdf

---

Dear Ms. Jones:

The 1RP for this incident is

<b>4974</b>	2/22/2018	A	Cambrian Mgmt	ARU Tank battery	30-025-00386	16S-32E-11F	10/28/2017
-------------	-----------	---	---------------	------------------	--------------	-------------	------------

Please remember to include this 1RP identifier to all communications. Also, please be advised that a release characterization/delineation workplan as detailed in the attachment must be approved by NMOCD BEFORE any remediation work.

Please note that if this October 2017 release (1RP-4974) did overlap with the November 2017 release (1RP-4887), then one delineation workplan would suffice. If the revised C-141 with different GPS coordinates, submitted on February 7, 2018, for the 1RP-4887 release should be used instead, then there must be 2 separate delineation plans based on the release locations.

Thanks,

Olivia Yu  
Environmental Specialist  
NMOCD, District I

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
