Shelly Tucker Bureau of Land Management 620 E. Greene St. Carlsbad, NM 88220 **APPROVED** By Olivia Yu at 8:09 am, Mar 13, 2018

NMOCD grants closure to 1RP-4659.

Re: Closure Request Letter Mas Federal #003H (1RP-4659) API #: 30-025-42950 Unit Letter B Section 34, Township 20S, Range 34E Lea County, NM

Ms. Yu / Ms. Tucker,

COG Operating LLC (COG) is pleased to submit for your consideration the following Closure Request for the Mas Federal #003H flare fire. The flare fire occurred on March 25, 2017 and impacted an area of pasture adjacent to the flare. This closure letter is in response to a request from the NMOCD that a soil sample be collected from the burned pasture.

On July 19, 2017, a COG representative collected a soil sample from the impacted area. Analytical results indicate no significant impact to the pasture and are provided below.

COG Operating LLC respectfully requests that the NMOCD and BLM grant closure approval for the Mas Federal #003H Flare Fire incident that occurred on March 25, 2017. If you have any questions or concerns please contact me.

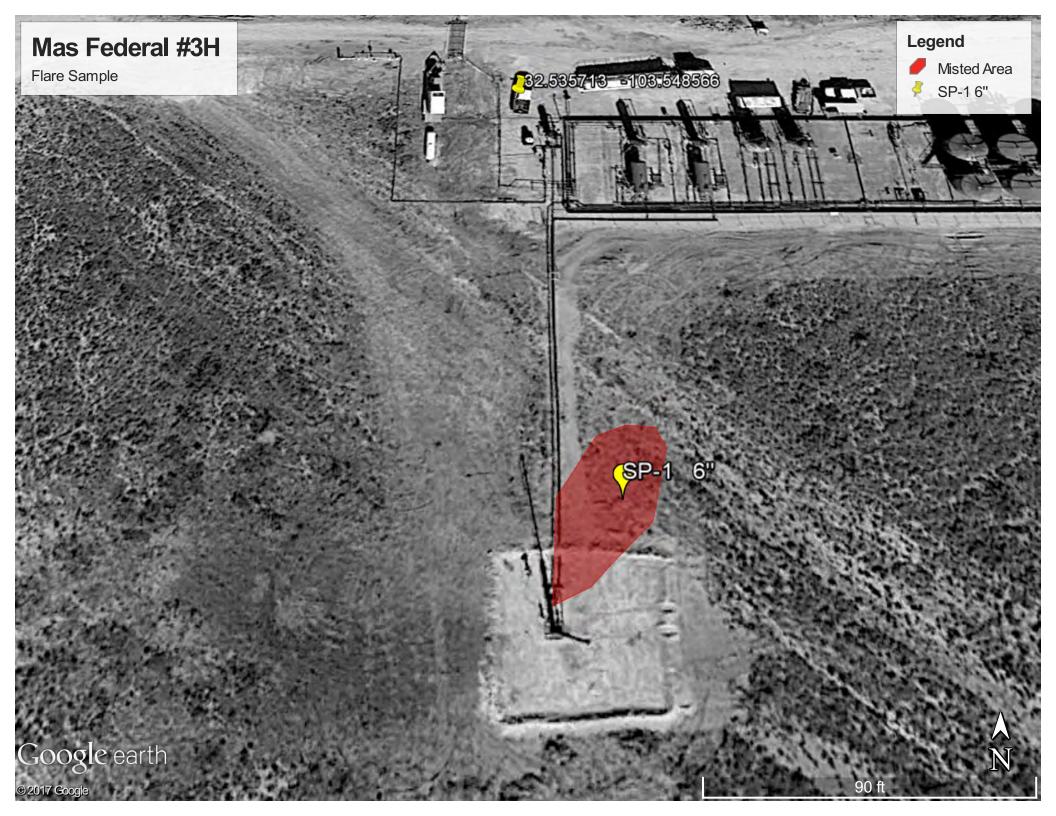

Sincerely,

Releva Hashell

Rebecca Haskell Senior HSE Coordinator rhaskell@concho.com

Rebecca Haskell:

We are reporting to you the results of the analyses performed on the samples received under the project name referenced above and identified with the XENCO Report Number(s) 558120. All results being reported under this Report Number apply to the samples analyzed and properly identified with a Laboratory ID number. Subcontracted analyses are identified in this report with either the NELAC certification number of the subcontract lab in the analyst ID field, or the complete subcontracted report attached to this report.

Unless otherwise noted in a Case Narrative, all data reported in this Analytical Report are in compliance with NELAC standards. The uncertainty of measurement associated with the results of analysis reported is available upon request. Should insufficient sample be provided to the laboratory to meet the method and NELAC Matrix Duplicate and Matrix Spike requirements, then the data will be analyzed, evaluated and reported using all other available quality control measures.

The validity and integrity of this report will remain intact as long as it is accompanied by this letter and reproduced in full, unless written approval is granted by XENCO Laboratories. This report will be filed for at least 5 years in our archives after which time it will be destroyed without further notice, unless otherwise arranged with you. The samples received, and described as recorded in Report No. 558120 will be filed for 45 days, and after that time they will be properly disposed without further notice, unless otherwise arranged with you. We reserve the right to return to you any unused samples, extracts or solutions related to them if we consider so necessary (e.g., samples identified as hazardous waste, sample sizes exceeding analytical standard practices, controlled substances under regulated protocols, etc).

We thank you for selecting XENCO Laboratories to serve your analytical needs. If you have any questions concerning this report, please feel free to contact us at any time.

Respectfully,

Huns hoah

Flagging Criteria

- X In our quality control review of the data a QC deficiency was observed and flagged as noted. MS/MSD recoveries were found to be outside of the laboratory control limits due to possible matrix /chemical interference, or a concentration of target analyte high enough to affect the recovery of the spike concentration. This condition could also affect the relative percent difference in the MS/MSD.
- **B** A target analyte or common laboratory contaminant was identified in the method blank. Its presence indicates possible field or laboratory contamination.
- **D** The sample(s) were diluted due to targets detected over the highest point of the calibration curve, or due to matrix interference. Dilution factors are included in the final results. The result is from a diluted sample.
- E The data exceeds the upper calibration limit; therefore, the concentration is reported as estimated.
- **F** RPD exceeded lab control limits.
- J The target analyte was positively identified below the quantitation limit and above the detection limit.
- U Analyte was not detected.
- L The LCS data for this analytical batch was reported below the laboratory control limits for this analyte. The department supervisor and QA Director reviewed data. The samples were either reanalyzed or flagged as estimated concentrations.
- **H** The LCS data for this analytical batch was reported above the laboratory control limits. Supporting QC Data were reviewed by the Department Supervisor and QA Director. Data were determined to be valid for reporting.
- K Sample analyzed outside of recommended hold time.
- JN A combination of the "N" and the "J" qualifier. The analysis indicates that the analyte is "tentatively identified" and the associated numerical value may not be consistent with the amount actually present in the environmental sample.
- ** Surrogate recovered outside laboratory control limit.
- **BRL** Below Reporting Limit.
- RL Reporting Limit

MDL Method Detection Limit	SDL Sample Detection Limit	LOD Limit of Detection
PQL Practical Quantitation Limit	MQL Method Quantitation Limit	LOQ Limit of Quantitation

- **DL** Method Detection Limit
- NC Non-Calculable
- + NELAC certification not offered for this compound.
- * (Next to analyte name or method description) = Outside XENCO's scope of NELAC accreditation

Attachments:	1RP4659.pdf

**** External email. Use caution. **** Dear Ms. Haskell:

This fire flare has been issued a 1RP-4659. The final C-141 will not be accepted until NMOCD receives laboratory analyses of a soil sample taken from the burned pasture. Please see the attachment for your records.

Olivia Yu Environmental Specialist NMOCD, District I <u>Olivia.yu@state.nm.us</u> 575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: (Notiication) (Flare Fire) Mas Federal #3 3//25/17 30-025-42950

MS. YU / MS. TUCKER,

COG OPERATING LLC IS REPORTING A RELEASE AT THE MAS FEDERAL #3 (30-025-42950) UNIT B SECTION 34 TOWNSHIP 20S RANGE 34E OGRID# [229137] THE RELEASE OCCURRED AT APPROXIMATELY 3/25/2017 6:00:00 AM ESTIMATED RELEASED: APPROX: .2BBLS OF OIL ESTIMATED RECOVERED: APPROX: 0BBLS OF OIL (NO FLUID WAS RECOVERED DUE TO THE FIRE BURNING OFF ANY FREE FLUID).

The release was caused by a pump failure resulting in a high pressure separator falure. This area is being evaluated and a C-141 will be submitted. If you have any additional questions.

THANK YOU,

Becky Haskell
