Attachments: approved_deferral_1RP4513_Young Deep Water Flood closure 7-6-17.pdf

Mr. Snow:

Please be advised that the closure report for 1RP-4513 is denied. NMOCD will grant a deferral for this release. At time of abandonment, retrofit, or inactivity, NMOCD requires release characterization/ delineation to be completed before remediation. Both processes must be approved by NMOCD and if necessary, BLM.

While EM survey does indicate that the depth of chloride-impacted soil is approximately 8 ft. bgs, there is no verified soil boring data for calibration or verification.

Thanks,

Olivia Yu
Environmental Specialist

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Olivia,

Let me know if you approved the closure. I did not get any of the emails where you requested additional information after the work plan was approved. My emails to Catherine are rejected. Thanks.

Ms. Green:

Please resubmit the final report in an optimized pdf document or separate into attachments each <15 MB. NMOCD's email security prevents zip attachments.

Thanks,
Olivia

Ms. Yu,

Please find the final report attached concerning the Young Deep Unit Injection pump house and tanks, 1 RP-4513. Matador would like to haul off the contaminated soil and rebuild the berm.

Kind Regards,

Catherine Green
