APPROVED
By Olivia Yu at 3:15 pm, Apr 03, 2018

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

A weld on a bridle failed on an inlet scrubber to the Saunders Plant. The weld on the bridle failed causing inlet gas to be released to atmosphere. Upon discovery of the failure, operations responded immediately, shutting the plant down. The inlet line was blocked in at the nearest block valve. To reduce pressure quickly, the valve to flare was opened. When the line was de-pressurized, the inlet scrubber was isolated and taken out of service. The Plant was restarted and normal operation resumed.

Describe Area Affected and Cleanup Action Taken.*

There was no cleanup required.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Dear Ms. Klein:

The available information indicates **OPERATOR** has met the requirements of 19.15.29 NMAC and no further corrective action is required. NMOCD considers **nOY1808730572** closed. This determination by the Oil Conservation Division does not relieve Operator of responsibility should future information indicate a threat to ground water, surface water, human health, or the environment. Furthermore, it does not relieve Operator of responsibility for compliance with any federal, state, or local laws and/or regulations.

Thanks,

Olivia Yu
Environmental Specialist

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: [EXTERNAL] RE: C-141 Targa Saunders gas release

Good morning Ms. Klein:

Please note that there is an updated C-141 form, version April 2017, on the NMOCD website.

Based on the GPS coordinates, the release location appears to be in the pasture. NMOCD requests photo documentation of the release point/infrastructure along with the final C-141 to confirm that there was no surface impact.

Thanks,

Olivia Yu
