---

Mr. Allen:

NMOCD will consider vertical delineation complete for 1RP-4644. However, release characterization- horizontally- will need to be completed with along with remedial activities. Please submit the data from December 5, 2017 sample date for AH-1 to AH-4.

Based on the delineation data presented, the area represented by TT-1 (AH-3) will be excavated at least to 3 ft. bgs, TT-2 (AH-1 and AH-2) to 1 ft. bgs, and TT-3 (AH-3) to 1 ft. bgs. Is this correct? Bottom and sidewall confirmation samples for chlorides only are required.

In the remediation report, on an appropriately scaled map, please 1) mark the release point and confirmation sample locations with GPS coordinates; and 2) annotate and outline areas with different depths of excavation. Dated photo documentation is requested of remedial activities.

Please confirm or inform for clarification.

Like approval from BLM required.

Thanks,

Olivia Yu  
Environmental Specialist  
NMOCD, District I

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

**Subject:** Devon Tresnor Mitchell 30 Federal Work Plan 1RP-4644

Hello!

I have attached, per Bob Allen SESI, the proposed work plan for the Devon Tresnor Mitchell 30 Federal. Please let us know if you have any questions.

*Thank You*

*Tara Hodges*
