Attachments: approved_(Work Plan) Red Raider BKS State #005H (30-025-42758) 12-29-2017 (1RP-4909)_final.pdf

Dear Mr. Hitchcock:

Notes:

- Please be advised that there is a NMOSE-identified waterway within 1000 ft. of the release location. NMOCD has an Oil and Gas Map on the main page. Please utilize this resource as a reference for hydrology assessment.
- There is a USGS water well, approximately 1000 m North of the release location, with data from 1991, indicating depth to groundwater to be around 18 ft. bgs.

NMOCD will agree that delineation is completed for 1RP-4909 with stipulations to the proposed remediation plan, taking the above information into consideration and revision of RRALs.

1. For the area represented by T-1, excavate to 1 ft. bgs and for T-2, excavate to 4 ft. bgs.
2. Confirmation bottom and sidewall samples are required for each of the different depths of excavation. Laboratory analyses of TPH extended and chlorides are required.
3. Include in the remediation report, an appropriately scaled map with 1) the confirmation samples locations and release point marked with GPS coordinates; and 2) outline and annotate the 2 areas with different depths of excavation.
4. Photo documentation of delineation and remediation activities.

Please confirm or inform for clarification.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I
Olivia.yu@state.nm.us
575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Olivia

Ms. Yu/Mr. Naranjo,

Please find the attached work plan for the Red Raider BKS State #005H release that occurred on December 29, 2017. Please let me know if you have any questions or concerns.

Thank you,

Sheldon L. Hitchcock
