RE: Salado Draw RWCS 1RC-11 ** 1RP-4818 **

BLM accepts your proposal with the following stipulations:

Once remedial activities have been completed, the area to the west of the facility where unauthorized staging of equipment has occurred, including the destroyed arch site, will need to be restored. Some form of a deterrent (temp fence, berms...??) will need to be put in place to keep vehicles off the area to allow revegetation. The area of the release that went past the facility will also need to be included in the restoration. Chevron can wait on reseeding until the appropriate time of season but in the meantime a barrier will need to be erected.

NOTE: LPC Timing Stipulations are in effect - from March 1st through June 15th. Please plan remedial activities accordingly. Check for African Rue...treat (before it gets out of control).

If you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

Shelly J Tucker

The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. **In such an event a site does not achieve successful restoration, or future issues with contaminants are encountered, the operator will be asked to address these issues until they are fully mitigated and the location is successfully reclaimed.** In addition, BLM approval does not relieve the operator of responsibility for compliance with any

other federal, state or local laws/regulations.

Josie,

Please submit the attached Delineation Report for 1RP-4818 to Olivia Yu with the NMOCD.
Please cc Shelly Tucker with the BLM, myself, and Mark Larson.

Regards,
Rich
