Date: Tuesday, June 13, 2017 11:17:00 AM

Dear Mr. Dominguez:

Please address these concerns regarding 1RP-4621. Please confirm.

- There is a USGS groundwater monitoring well, less than 1000m from release location with data from 2016, indicating the water table at 53 ft. bgs. There also appears to be a NMOSE stream less than 500 m NE of the release.
- Due to depth to water table, additional vertical delineation is requested at SP2, SP3 and SP5 to 10 ft. bgs.
- Establish one additional sample location near the tail of release with SP5, at the southern end of the impacted pasture.
- Revegetation date is incorrect.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I

575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Ms. Yu,

Attached for your review is the Work Plan for the MB-5-12, operated by Energy Transfer.
