I'll be out of the office till Nov 2, but will be happy to discuss when I get back.

Thanks,

Matt Buckles

Mr. Buckles:

NMOCD does not have records of either Magpie releases. If IRPs were issued, please provide along with a delineation/release characterization workplan. Otherwise, please submit a C-141 form with the release information. If these releases are historic or volume of releases are unknown, indicate as such.

RE: 1RP-4540

More information is required, such as documentation of a depth to water table search (e.g., USGS, NMOSE, Chevron water trend map) and distance to surface water bodies/wellheads. Also, the extent of the release area needs to be demarcated on a scaled map. Details are in the directive appended to the reviewed initial C-141 form.

What are the proposed remediation plan for these releases? Please be advised that all remedial activities are considered conducted at risk if release characterization/delineation workplans were not approved by NMOCD.

Olivia

Attached are the results from our testing let me know if you have any questions. I will be giving you both a call this week to discuss remediation plans.

Thanks,

Matt Buckles

Matt,

Can I get an update on these releases, please?

Thank you,

Just wanted to update everyone on the status of the magpie releases and state 35. We were finally able to get a core rig out to these locations this past week and get data. We will submit samples to cardinal today and should have results in the next few weeks.

Hope everyone has a safe weekend,

Thanks,
Matt Buckles

Sure does, we are hoping to get away from the dig and haul method and looking at other options.

Thanks,
Matt

Matt,

Does the Magpie St. 1 have the same status?

Thank you,

Still working on the delineation and workplan. We are trying to devise a solution with a less invasive procedure then dig and haul but as of right now it is a work in progress.

Thanks,
Matt

Subject: State 35 Release: 1RP-4540

Good morning Mr. Buckles:

Please inform of the status of the delineation workplan for 1RP-4540. The reviewed initial C-141 is attached for your guidance.

Thanks,

Olivia Yu

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
